

BGB-16673-302

Inclusion and Exclusion Criteria

Key Inclusion Criteria:

Confirmed diagnosis of CLL or SLL, requiring treatment, based on 2018 international workshop on chronic lymphocytic leukemia (iwCLL) criteria.

Previously received treatment for CLL/SLL with both a BTKi and a BCL2i.

Participants with SLL must have measurable disease by computer tomography (CT)/magnetic resonance imaging (MRI)

Eastern Cooperative Oncology Group (ECOG) score 0, 1, or 2

Adequate liver function

Adequate blood clotting function

Key Exclusion Criteria:

Known prolymphocytic leukemia or history of, or currently suspected, Richter's transformation

Prior autologous stem cell transplant or chimeric antigen receptor-T cell therapy in the last 3 months

Known central nervous system involvement

Prior exposure to any BTK protein degraders

Active fungal, bacterial and/or viral infection requiring parenteral systemic therapy

Clinically significant cardiovascular disease

NOTE: Other protocol defined Inclusion/Exclusion criteria may apply.
